

UHV - Tutorial

Activity 4

a) State of the planet.

→ The Gore talks about Planet Earth. He ~~aimed~~ aimed is alerting the public to an increasing public planetary emergency due to global warming and shows incidents from his life story which ~~he~~ influenced his concerns about environmental issues. For comic effort Gore uses a clip from movie to describe the greenhouse effect.

b) Root cause of the problem

→ Global warming is the main root cause of the problem. Gore also presents Antarctic via coring cloth showing CO₂ levels higher now than in the past 650,000 years. The effect of global warming can be successfully reversed by planting more vegetation. The day and night use of machine, electricity and vehicles causes abundant emission of CO₂ which makes human to breathe CO₂ more.

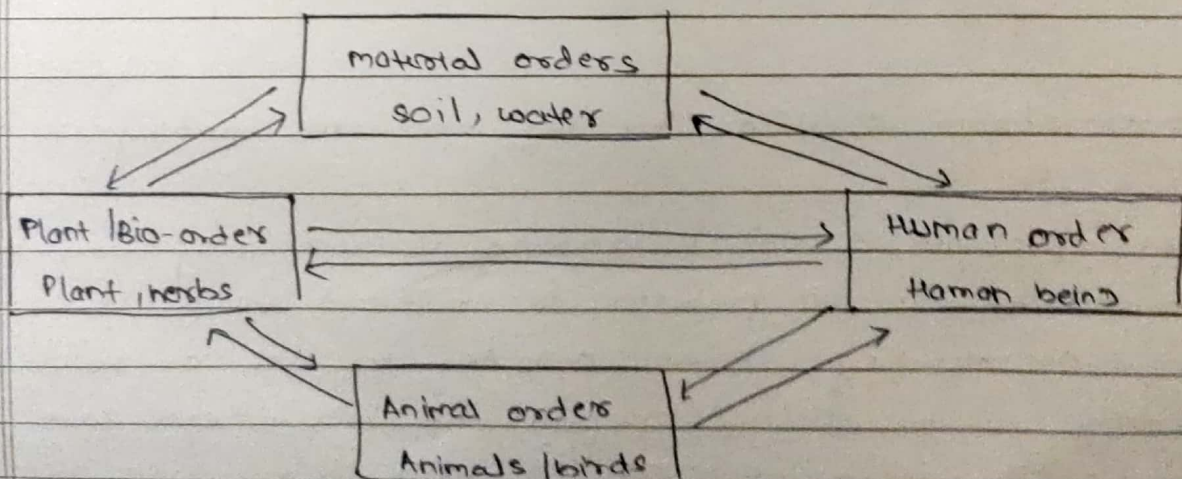

c) Comprehensive solution for the problems and your specific part in it.

→ The problem of global warming is increasing day by day. The solution to the problem is to avoid using unwanted pollution creating items and try to be as much eco-friendly as you can and to focus on how we can save our fossils as much as we can to help our future and my part to the solution is that I am maturing my family to go eco-friendly and showing them benefit of solar-energy.

Take any one environmental issue in your neighbourhood and try to find out root cause of it. What exactly can you contribute as an individual, class or institution to the solution.

→ Deforestation is the depletion of trees and forests at an alarming rate. The day and night cutdown of trees causes so much deforestation. Trees are backbone to earth and their cutting causes a greenhouse to earth. The solution to the problem is to avoid cutting of tree and start to grow as much trees as possible. My role in the solution is i am part of the growing and planting committee.

Observe the activity, innateness, natural characteristic and inheritance of at least two units in each of the four orders. Are you able to see that these orders are in a relationship of mutual fulfilment?

→ This plant/Bio-order and material order, naturally exist in a relationship of mutual fulfillment with each other. There is mutual interdependency and co-existence we can see here. The material order provides the basics for movement of all animals, birds and fishes, water, oxygen and others gases are necessary for both plants and animals. At the same time, the Animal order helps enrich the soil with its excrete and these excreta helps the plants with nutrients.

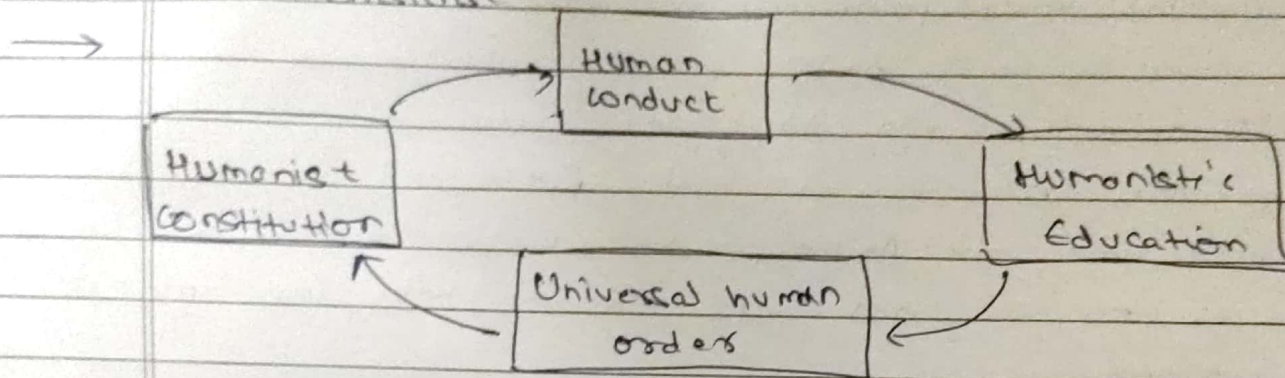

Are you in space?

→ The manifests in the form of harmonious interaction of units i.e. consciousness and material with each other. Being in coexistence in all the prevailing space. Space is no-activity, transparent and the units in nature are submerged in space.

Are you are getting energy from body? Is your energy dependent on the body? When your body is sick, does your energy to think diminish? Are you energised in space?

→ Being in space, units are self organised, energised and fulfill the relationship with each other, leading to complete existential order. Such understanding enables the human being to achieve harmony to oneself. Harmony and right understanding provides us the clarity about its definitiveness.

Make a chart for the whole existence. List down different courses of studies and relate them to different realities in the existence.

→ The conduct of human ensures that continuity of mutual happiness and prospers the whole existence ~~extends~~ except the human being is already operating in harmony.

→ Education that ensures the development of the competence to live with definite human conduct. The society in which human goal is realised. Nature of society of people living together in a relationship of mutual fulfilment. The right understanding helps us to identify the comprehensive human goals.
